

Third-party stand guide

SMART kapp

SMART kapp™ 42" capture board (kapp42)

Third-party stands for SMART kapp 42" capture boards

SMART has evaluated a number of third-party stands for use with SMART kapp™ 42" capture boards.

 **CAUTION**

SMART makes the following recommendations for third-party stands:

- The stand uses a 400 × 400 VESA® mounting pattern
- The stand can support 35 lb. (16 kg)
- The stand has no large platforms or AV shelves that extend from the front.
- The stand can mount the capture board using M6 screws that go into the back of the capture board to a depth of no more than 5/16" (8 mm).

For purchasing information, troubleshooting and support for a third-party stand, contact the supplier of the stand.

Special mounting considerations

When installing the third-party stand, follow the manufacturer's instructions with one exception. Mount the capture board holding bracket in the portrait orientation as shown in the photo the right.

Tips for mounting the adapter bracket

Attach the adapter brackets to the stand's fixed plate and then attach the adapters and fixed plate to the back of the capture board as shown in the photo to the left.

This is also the best configuration for transporting the capture board. Lift the capture board with its attached bracket and place in the tripod head. SMART recommends using the provided cap screws to hold the fixed plate to the tripod head.
